28. Significant Events for the Time Period Reported (summarize significant progress made, evacuations, incident growth, etc.):

Firing operations were started in Div A. The firing operation will be completed later this mornning. This will secure the the

Incident: LODGE COMPLEX

southern portion of the west flank of the fire. Plans to start firing the northern portion are planned for later tonight. No fires were reported outside the line during the firing operation. Crews continue to construct line in other divisions making progress. A medical aid occured on the fireline and the patient was transported to camp and examined by MERT. A vehicle accident in Fort Bragg (unrelated to this incident), cutting a fiber optic cable and has effected cell phone service to this area. No ETA on it's repair.

29. Primary Fuel Model, or Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc.):

Fuel Model: Timber (Litter and Understory)

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc.):

Structural Summary	# Threatened (up to 72 hrs)	# Damaged	# Destroyed
Single Residences	3	0	0
Multiple Residences	6	0	0
Mixed Commercial / Residential	0	0	0
Nonresidential Commercial Property	0	0	0
Other Minor Structures	8	0	0

31. Public Status Summary:			1000000	32. Responder Status Summary:

	Area Restriction in Effect	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour timeframes:

The completion of the firing operations in portions of the fire may be tested today by any winds associated with 12 hours: any thunderstorm that might develope. This could also affect other parts of the fire. Spread of the fire will continue in all directions.

The potential for spread toward the east increases with an onshore wind. Spot fires are continued to be discovered and the fires continue to spread out in all directions.

The fire has potential to reach the Elkhorn Ridgeridge to the west and back down the leeward side advancing toward the contingency lines, and advance eastward to Brushy Ridge.

The fire has potential to be pushed eastward along a south facing slope if all the weather conditions are right. This would allow the fire to have a long, strong run toward the dozerline. The fuels along this ridge are brushy

72 hours: and create spotting conditions which would allow for spotting conditions across the line. This run could continue to Hwy 101. Repeaters, located atop of Cahto Mountain, consists of Verizon, CHP, AT&T, Cal Fire and multiple others could be threatened by the fire.

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

100% CONTAINMENT

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder
12 hours: Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor.

Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder
24 hours: Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor.

Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder
48 hours: Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor.

Incident: LODGE COMPLEX

72 hours:

48 hours:

Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor, the town of Laytonville and Hwy 101, repeaters, located atop of Cahto Mountain, consisting of Verizon, CHP, AT&T, Cal Fire and multiple others

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

5 type III strike teams of engines to support firing operations and construct line; 5 strike teams of type I

handcrews to support firing operations and construct fireline; 10 C-fallers; 3 DIVS; 4 SOFR; 5 FEMP; 5 HEQB

5 type III strike teams of engines to support firing operations and construct line; 5 strike teams of type I handcrews to support firing operations and construct fireline; 10 C-fallers; 3 DIVS; 4 SOFR; 5 FEMP; 5 HEQB

10 type III strike teams of engines to support firing operations and construct line; 5 strike teams of type I handcrews to support firing operations and construct fireline; 10 C-fallers; 3 DIVS; 4 SOFR; 5 FEMP; 5 HEQB

15 type III strike teams of engines to support firing operations and construct line and provide structure protection; 5 strike teams of type I handcrews to support firing operations and construct fireline; 10 C-fallers; 3

DIVS; 4 SOFR; 5 FEMP; 5 HEQB

Anticipated after 72 hours:

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

The above resources are necessary to ensure safe operations. Remote location of this fire, on extremely steep terrain and in heavy fuels, is a contributing factor. All containment lines must scouted, reviewed prior to construction. Resources are needed to fully staff fire. Currently some divisions and branches are unstaffed due to lack of resources. Some fireline personnel are working in multiple ICS roles. Dozerline, on Brushy Ridge, east of the fire has continues from Drop point 4 to Drop point 5.

41. Planned Actions for Next Operational Period:

Continue to construct direct handline when possible, indirect line as planned. Improve existing lines. Build contingency lines, additional contingency lines are being scouted and identified. Additional BLM READ have been supplied to review containment and contingency lines. Firing operations will continue in the Low Gap area.

42. Projected Final Incident Size/Area: 14,000

43. Anticipated Incident Containment or Completion Date: 08/20/2014

44. Projected Significant Resource Demobilization Start Date: 08/15/2014

45. Estimated Incident Costs to Date: \$2,677,002.00

46. Projected Final Incident Cost Estimate: \$6,000,000.00

47. Remarks (or continuation of any blocks above – list block number in notation):

ICP located in Laytonville. Fire spread continues to be a threat to numerous high profile areas including the conservancy owned and operated by UC Berkeley, which includes USGS Hydrologic Bench Mark Stream for stream monitoring purposes. It is also a critical zone observatory. UC Berkeley is utilizing a \$5 million grant for continued studies in this area. BLM has numerous threatened and endangered species in this area, including a designated Wilderness Area and a Wild & Scenic River Corridor.

ERC's are historic high levels. Handlines are the primary control line which is hampered by the steep terrain, potential for rolling debris to ignite fuels below working crews, and high temperatures. The average slope is 70%.

Additional resources have been arriving and has helped achieve short term goals. Additional prep work being done to

Incident: LODGE COMPLEX

structures in the Horseshoe Bend area. Drift smoke from the fire has been settling in the Ukiah Valley and could create potential health and economic impacts, including vineyards and pear orchards .

All times represented are in Central Standard Time (CST) unless otherwise noted.
